Funke's 4G LTE INERT Technology

For preventing LTE interferences to affect TV signals, Funke has come up with a whole new technology called the Funke 4G LTE INERT technology. Unlike any other antenna products, the INERT technology applied to the Funke antennas does not only work by filtering the LTE signals, it also tackles the problem at its root by working at the very beginning of the signal reception stage.

	UHF
Frequency range	470 - 790 MHz
Antenna gain	20 dBi
Amplifier gain	16 dB
Amplifier noise	1,2 dB
Input voltage	5 ± 0,5 Vdc

Maximum distance is an indication and depends on the network specifications and circumstances regarding the geographical surroundings of the antenna. No rights can be claimed from the information on this product card.
